

Questions 1–9

- 1 The science dome notice asks: which word correctly completes this sentence?
Zoe drew ____ acorn on a card before visiting the creek.
- A many B an
C a D some
-
- 2 While preparing the space exhibition, which word is the verb in this sentence?
Isla labelled the silver models securely.
- A labelled B Isla
C silver D models
-
- 3 A science dome challenge asks: which word correctly completes this sentence?
Last week, Zoe ____ the models for the space exhibition.
- A label B labels
C labelling D labelled
-
- 4 To check the space exhibition, which word tells how the action was done?
The team labelled each model securely at the science dome.
- A labelled B dome
C securely D team
-
- 5 At the science dome, decide: which sentence uses the correct subject pronoun for work on the space exhibition?
- A Zoe and myself prepared the models. B Zoe and I prepared the models.
C Zoe and me prepared the models. D Me and Zoe prepared the models.
-
- 6 The space exhibition question is: which word correctly joins these ideas?
Zoe worked securely ____ the space exhibition had to be ready that afternoon.
- A because B but
C or D until
-
- 7 In a science dome activity, the silver model belongs to Zoe and Isla. Which word can replace **the model belonging to Zoe and Isla**?
- A his B hers
C ours D theirs
-
- 8 The space exhibition sheet asks: which sentence about the lizards has correct subject–verb agreement?
- A The lizard move towards the shelter. B The lizards moving towards the shelter.
C The lizards move towards the shelter. D The lizards moves towards the shelter.
-
- 9 For today's science dome task, which word can be used instead of **circle, square and triangle**?
- A buildings B shapes
C animals D drinks

Questions 10–18

- 10 A space exhibition clue asks: which punctuation mark correctly completes this calm command?
Please place the models beside the science dome desk ____
- A . B ?
C ! D ,
- 11 During the science dome session, which contraction is punctuated correctly for the words **we are**?
- A were B 'were
C w're D we're
- 12 The space exhibition check asks: which sentence uses a comma correctly for the space exhibition?
- A Before the first tour,, we arranged the models. B Before the first tour; we arranged the models.
C Before the first tour, we arranged the models. D Before the first tour we, arranged the models.
- 13 On a science dome card, which sentence spoken at the science dome should end with a question mark?
- A The models are beside the door B Where should we store the models after the space exhibition
C I know where the models belong D Please store the models now
- 14 At the science dome, which sentence punctuates Isla's excited words correctly?
- A "The models are ready!" called Isla. B "The models are ready! called Isla."
C The models are ready!" called Isla. D "The models are ready!" Called Isla.
- 15 For the space exhibition, which sentence uses capital letters correctly for Zoe's trip?
- A On monday, Zoe visited Brisbane. B On Monday, zoe visited Brisbane.
C On Monday, Zoe visited brisbane. D On Monday, Zoe visited Brisbane.
- 16 During science dome work, which words show that one pony owns the saddle?
The ____ saddle was cleaned at the science dome.
- A ponys' B pony is
C pony's D ponys
- 17 The space exhibition team asks: which word completes the sentence about the space exhibition?
____ models won a special award.
- A Theirs B Their
C There D They're
- 18 In the space exhibition, which option is a complete sentence connected with the space exhibition?
- A The silver model was placed beside the science dome. B Beside the science dome.
C Because the space exhibition finished. D Carrying the models carefully.

Questions 19–25

- 19 A science dome card asks: which pronoun can replace **Zoe and Isla**?
Zoe and Isla labelled the models for the space exhibition.

A She B We
C It D They

- 20 Before the space exhibition, which word agrees with the main subject?
The box of models ____ beside the science dome entrance.

A were B be
C is D are

- 21 The science dome notice asks: which instruction for the space exhibition is punctuated correctly?

A When ready;, return the models. B When ready, return the models.
C When ready return, the models. D When ready,, return the models.

- 22 While preparing the space exhibition, where should the missing apostrophe go?
The teachers lunchboxes were packed beside the creek.

A teachers' B teachers
C teacher's D teachers's

- 23 A science dome challenge asks: which sentence is a direct question and needs a question mark?

A I wonder when the space exhibition will begin B Tell me when the space exhibition begins
C The space exhibition begins at the science dome D When will the space exhibition begin at the science dome

- 24 To check the space exhibition, which sentence correctly reports what Zoe said during the space exhibition?

A "Bring the models, please," Called Zoe. B "Bring the models, please, called Zoe."
C "Bring the models, please," called Zoe. D "Bring the models, please,", called Zoe.

- 25 At the science dome, decide: which sentence has correct agreement for the space exhibition?

A Neither the models are complete. B Neither of the models is complete.
C Neither of the models are complete. D Neither of the model is complete.

Spelling · Questions 26–50

To the student

Ask your teacher or parent to read the spelling words aloud. Write the correct spelling of each word on the lines below.

26	_____	27	_____
28	_____	29	_____
30	_____	31	_____
32	_____	33	_____
34	_____	35	_____
36	_____	37	_____
38	_____	39	_____
40	_____		

Read the sentences. The spelling mistake in each sentence is underlined. Write the correct spelling of the underlined word in the box.

41	The menu <u>offrs</u> soup, salad and sandwiches.	
42	The museum <u>opns</u> at nine o'clock each morning.	
43	Leo <u>paits</u> a bright scene of the harbour.	
44	Please <u>repace</u> the lid after using the jar.	
45	The students <u>dislay</u> their models on a long table.	

Each line has one word that is incorrect. Write the correct spelling of the word in the box.

46	The kind message pleses everyone in the group.	
47	The chef prepres fresh bread each morning.	
48	Nina presnts her research to the class.	
49	A thick shell protcts the turtle's body.	
50	The roof provdes shade on hot days.	

Echidnas on the Move · Questions 1–6

Echidnas on the Move

Echidnas live in woodlands and grasslands. They are well suited to this place, but they still need food, water and shelter to survive. Conditions can change across the day and through the seasons, so safe resting places are important.

Features such as strong claws and a long sticky tongue help them dig for hidden food. These adaptations make everyday tasks easier and can also help them avoid danger. Young organisms survive best when their surroundings provide suitable food or nutrients and shelter.

They obtain what they need from ants and termites. As they live and grow in their habitat, they also become part of a larger food web that connects plants and animals. Changes to one part of this web can affect many other living things.

One challenge is busy roads. People can help by driving carefully near wildlife signs, observing living things responsibly and leaving natural shelters undisturbed. Small, repeated actions can protect the habitat without preventing people from learning about it.

- 1 During the science dome session, what is the main purpose of **Echidnas on the Move**?

A to explain how echidnas live and survive
B to tell a fantasy story about echidnas
C to give instructions for catching echidnas
D to advertise a wildlife toy echidnas

- 4 At the science dome, which change would probably cause the greatest problem for echidnas?

A careful wildlife watching
B busy roads
C a protected shelter
D more suitable food

- 2 The space exhibition check asks: in **Echidnas on the Move**, what does **adaptation** mean?

A a sudden loud warning
B a place where tickets are sold
C a change in the weather forecast
D a feature that helps a living thing survive

- 5 For the space exhibition, in paragraph 2 of **Echidnas on the Move**, who does **them** refer to?

A echidnas
B the people
C the natural shelters
D the food sources

- 3 On a science dome card, how do features such as strong claws and a long sticky tongue help echidnas?

A turn their food into water
B stop every kind of danger
C dig for hidden food
D make their habitat disappear

- 6 During science dome work, which heading would best suit the final paragraph of **Echidnas on the Move**?

A A Make-Believe Adventure
B How to Build a Toy
C A List of Australian Cities
D Helping Echidnas

Create a String Telephone · Questions 7–12

Create a String Telephone

Follow these steps to make a telephone that carries sound along string. Work carefully and ask an adult for help whenever a material needs cutting or a location must be checked for safety. Read every step before beginning so the equipment can be arranged in the correct order. Keep the workspace tidy and use each material only as described. Check each observation before recording it.

Materials

- two paper cups
- string
- a pencil
- two paper clips
- a partner

Steps

1. Ask an adult to make one hole in each cup.
2. Thread and secure the string.
3. Stand apart until the string is tight.
4. Speak softly while a partner listens.
5. Record the result clearly, then pack away all equipment.

7 The space exhibition team asks: what is the purpose of **Create a String Telephone**?

- A** to advertise expensive equipment **B** to decorate a party invitation
C to make a telephone that carries sound along string **D** to write a fictional story

10 Before the space exhibition, what does **record** mean in the final step of **Create a String Telephone**?

- A** hide **B** erase
C guess **D** write down

8 In the space exhibition, what should be done first in **Create a String Telephone**?

- A** pack away all equipment **B** ask an adult to make one hole in each cup
C thread and secure the string **D** stand apart until the string is tight

11 The science dome notice asks: why should the result in **Create a String Telephone** be recorded carefully?

- A** to use every material at once **B** to prevent the title from changing
C to make the result easier to check and compare **D** to make the equipment heavier

9 A science dome card asks: why should the instructions for **Create a String Telephone** be followed in order?

- A** so each stage is completed before the next one begins **B** so the title becomes longer
C so the materials change colour **D** so no observations are recorded

12 While preparing the space exhibition, which text feature most clearly shows that **Create a String Telephone** is a procedure?

- A** a labelled story setting **B** a materials list and numbered steps
C characters speaking to each other **D** rhyming lines

The Bell in the Attic · Questions 13–18

The Bell in the Attic

Zoe was helping near her grandmother's attic when Zoe noticed a small handbell. It looked ordinary at first, but one detail seemed new. Zoe looked around for clues before touching or moving anything.

As Zoe examined it more closely, the bell rang whenever it faced north. Zoe hesitated. The discovery was exciting, yet it might belong to someone else or be too delicate to handle alone. A hurried choice could damage both the object and the clues around it.

Instead of rushing ahead, Zoe followed its direction through stacked boxes. Each new clue matched something already visible in her grandmother's attic, so the search became careful rather than wild. Zoe paused after every step to record what had changed.

At last, she found a missing album of family photographs. Zoe wrote a short note explaining where the object had been found and what had happened. The note included the order of the clues so another person could check the discovery.

By the end of the afternoon, the discovery had become part of the place's story. Zoe was proud, not because the object was valuable, but because patience and careful thinking had protected it. The adults agreed that the object should stay with a clear label for future visitors.

13 A science dome challenge asks: why did Zoe hesitate in **The Bell in the Attic**?

- | | |
|--|--|
| A the object might belong to someone or be delicate | B the location was already closed |
| C the object was too heavy to see | D the clues had all disappeared |

16 The space exhibition question is: why was Zoe's careful action important in **The Bell in the Attic**?

- | | |
|--|--|
| A it changed the location into a shop | B it protected the object and used the clues safely |
| C it made the object disappear | D it stopped anyone learning the result |

14 To check the space exhibition, what does **hesitated** mean in **The Bell in the Attic**?

- | | |
|----------------------------------|--|
| A shouted with excitement | B ran away immediately |
| C forgot the discovery | D paused because of uncertainty |

17 In a science dome activity, what changes by the end of **The Bell in the Attic**?

- | | |
|--|---|
| A the discovery becomes part of the place's known story | B the location is permanently closed |
| C the character throws the object away | D all records of the discovery are removed |

15 At the science dome, decide: what did Zoe find at the beginning of **The Bell in the Attic**?

- | | |
|------------------------------|---------------------------------|
| A a box of fresh food | B a broken sports trophy |
| C a small handbell | D a new school bag |

18 The space exhibition sheet asks: which idea is most important in **The Bell in the Attic**?

- | | |
|--|---|
| A Valuable objects should always be hidden. | B Every old place is unsafe to visit. |
| C Clues are useful only when found quickly. | D Patience and careful thinking can protect a discovery. |

Zoe's Community Collection · Questions 19–24

Zoe's Community Collection

The Year 3 team weighed four groups of donated supplies for a community project at the creek. The supplies were packed into containers before delivery.

Supply	Total mass	Containers
Potatoes	24 kg	6
Onions	24 kg	8
Peas	25 kg	5
Corn	36 kg	4

- 19 For today's science dome task, which supply in **Zoe's Community Collection** had the greatest total mass?

A Onions B Peas
C Corn D Potatoes

- 22 The space exhibition check asks: why could fewer containers in **Zoe's Community Collection** still have a greater total mass?

A The table counts only empty containers. B The supplies have no mass.
C A smaller number is always greater. D Each container could be much heavier.

- 20 A space exhibition clue asks: what was the combined mass of the potatoes and peas in **Zoe's Community Collection**?

A 1 kg B 49 kg
C 43 kg D 55 kg

- 23 On a science dome card, what does **donated** mean in the introduction to **Zoe's Community Collection**?

A hidden underground B weighed a second time
C given to help others D sold at a high price

- 21 During the science dome session, if the onions were shared equally among 8 containers, what mass would be in each container?

A 3 kg B 8 kg
C 16 kg D 24 kg

- 24 At the science dome, which sentence best summarises **Zoe's Community Collection**?

A The community returned all the supplies. B Several supplies were weighed, packed and given to a community project.
C Only one type of supply was collected. D Every container had exactly the same mass.

Fog in the Garden · Questions 25–30

Fog in the Garden

A white light spreads through the air,
 while mist drift across the sky.
 The sound of leaves in the breeze rises there,
 and the birdbath reflects the sky.
 Small surfaces shine beneath the light;
 each one wears borrowed jewels bright.
 My boots cast shapes, dark and round,
 then scatter them across the ground.
 The path, so noisy in the day,
 grows soft as busy sounds fade away.
 I feel careful and curious as I see
 the changing world in front of me.

- 25 For the space exhibition, which line in **Fog in the Garden** shows that something is moving?

A while mist drift across the sky **B** A white light spreads through the air
C My boots cast shapes, dark and round **D** I feel careful and curious as I see

- 28 In the space exhibition, which detail from **Fog in the Garden** appeals most strongly to hearing?

A Small surfaces shine beneath the light. **B** The sound of leaves in the breeze rises there.
C The birdbath reflects the sky. **D** Borrowed jewels shine brightly.

- 26 During science dome work, what are the **borrowed jewels** in **Fog in the Garden**?

A small hidden insects **B** pieces of broken glass
C painted yellow flowers **D** drops or bright reflections on surfaces

- 29 A science dome card asks: how does the speaker feel in **Fog in the Garden**?

A careful and curious **B** angry and frightened
C bored and impatient **D** sleepy and confused

- 27 The space exhibition team asks: in **Fog in the Garden**, why does the poet say the **birdbath reflects the sky**?

A The sky has fallen to the ground. **B** The birdbath is completely dry.
C The birdbath shows an image of the sky. **D** The birdbath is above the clouds.

- 30 Before the space exhibition, what is the main idea of **Fog in the Garden**?

A Walking outdoors is always dangerous. **B** Busy sounds should never become quiet.
C Reflections make every surface impossible to see. **D** An ordinary place can look special when light, weather or time changes.

Narrative Writing Task

The Clock That Ran Backwards

Write a narrative about a clock that begins moving backwards during a school visit.

Plan your story

- Who is the main character, and where does the story begin?
- What makes the discovery unusual or important?
- What problem, risk or decision must the character face?
- Which clues or actions move the story forward?
- How is the problem resolved, and what changes at the end?

Remember

- Plan before you begin.
- Use paragraphs to organise events.
- Choose precise verbs and interesting details.
- Check spelling, punctuation and sentence boundaries.
- Give the narrative a clear ending.

Check: characters, setting, complication, ending, paragraphs, spelling and punctuation.

Writing space

Questions 1–3

- 1 The science dome notice shows this number trail: Which number comes next?
169, 179, 189, ____

A 199 B 189
C 209 D 190

- 2 While preparing the space exhibition, answer this place-value label: What is the value of the digit 7 in **3,747**?

A 7 B 70
C 7000 D 700

- 3 A science dome challenge uses this number comparison: Which statement about **431** and **474** is true?

A $431 = 474$ B $474 < 431$
C $431 < 474$ D $431 > 474$

Questions 4–6

4 To check the space exhibition, solve this total calculation: What is $268 + 151$?

- A 117 B 419
C 409 D 429

5 At the science dome, decide this difference calculation: What is $655 - 284$?

- A 371 B 361
C 381 D 939

6 The next space exhibition task is a equal-group count: There are 8 trays with 8 muffins on each tray. How many muffins are there altogether?

- A 56 B 72
C 16 D 64

Questions 7–9

- 7 In a science dome session, complete this fair-sharing problem: 48 stickers are shared equally among 6 children. How many stickers does each child receive?

A 10 B 42
C 8 D 6

- 8 The space exhibition sheet includes this odd-number sort: Which number is odd in Paper 7?

A 58 B 55
C 54 D 56

- 9 For today's science dome work, solve this missing-factor puzzle: Which number makes this equation true?
 $6 \times \square = 42$

A 7 B 5
C 6 D 8

Questions 10–12

10 A space exhibition clue requires this coin total: Zoe has 5 two-dollar coins and 7 one-dollar coins. How much money is there altogether?

- A \$15 B \$19
C \$21 D \$17

11 During the science dome session, answer this finishing-time check: A lesson starts at 9:25 am and lasts 35 minutes. When does it finish?

- A 10:10 am B 11:00 am
C 10:00 am D 9:35 am

12 The space exhibition check uses this calendar jump: Today is Monday. What day will it be in 9 days?

- A Friday B Wednesday
C Tuesday D Thursday

Questions 13–15

- 13 On a science dome card, complete this length conversion: How many centimetres are equal to 2 metres?

A 200 cm B 20 cm
C 2000 cm D 2 cm

- 14 At the science dome, solve this boundary measurement: A rectangle is 7 cm long and 5 cm wide. What is its perimeter?

A 12 cm B 28 cm
C 2 cm D 24 cm

- 15 For the space exhibition, answer this square-unit diagram: How many square units cover the rectangle shown in Paper 7?

A 28 B 10
C 21 D 14

Questions 16–18

- 16 A science dome activity includes this capacity match: Which amount is equal to 4 litres?

A 40000 mL B 4000 mL
C 400 mL D 40 mL

- 17 The space exhibition team needs this mass comparison solved: A bag of rice has a mass of 1040 g. A bag of pasta has a mass of 670 g. How much heavier is the rice?

A 370 g B 1710 g
C 470 g D 670 g

- 18 In the space exhibition, complete this fraction diagram: What fraction of the bar in Paper 7 is shaded?

A $\frac{9}{13}$ B $\frac{10}{12}$
C $\frac{8}{12}$ D $\frac{9}{12}$

Questions 19–21

- 19 A science dome card gives this halving problem: What is half of 54?

A 30 B 52
C 27 D 24

- 20 Before the space exhibition, solve this symmetry diagram: How many lines of symmetry does the square shown in Paper 7 have?

A 3 B 4
C 0 D 1

- 21 The science dome notice shows this angle description: Which description matches an angle of 70 degrees?

A an acute angle B a right angle
C an obtuse angle D a straight angle

Questions 22–24

- 22 While preparing the space exhibition, answer this solid-shape check: How many faces does the rectangular prism shown in Paper 7 have?

A 4 B 8
C 12 D 6

- 23 A science dome challenge uses this grid-location clue: On the Paper 7 map, which location is in square D3?

	A	B	C	D
1			pond	
2		gate	bench	
3				tree

A bench B gate
C tree D pond

- 24 To check the space exhibition, solve this data-table question: A class recorded books read in Paper 7: Monday 17, Tuesday 29, Wednesday 19, Thursday 15. On which day were the most books read?

A Thursday B Tuesday
C Monday D Wednesday

Questions 25–27

- 25 At the science dome, decide this graph comparison: The Paper 7 graph shows points scored by four teams. How many more points did team B score than team W?

- 26 The next space exhibition task is a chance experiment: A Paper 7 spinner has 1 red, 3 blue, 1 green and 1 yellow equal sections. Which colour is most likely?

- A red B green
C yellow D blue

- 27 In a science dome session, complete this growing pattern: Which number comes next in Paper 7?
9, 14, 19, 24, ____

- A 34 B 30
C 29 D 24

Questions 28–30

- 28 The space exhibition sheet includes this missing-addend puzzle: Which number makes this equation true in Paper 7?
 $25 + \square = 59$

A 84 B 34
C 29 D 25

- 29 For today's science dome work, solve this array-and-remainder problem: A small bus has 7 rows with 6 seats in each row. 5 seats are empty. How many seats are occupied?

A 37 B 42
C 32 D 18

- 30 A space exhibition clue requires this two-step grouping problem: A gardener has 63 seedlings. She plants 7 rows of 6 seedlings. How many seedlings are left?

A 56 B 43
C 27 D 21

Conventions of Language · L1–L25

L1 · B — an

Use *an* before the vowel sound at the start of *acorn*.

L14 · A — “The models are ready!” called Isla.

The spoken words and exclamation mark stay inside the speech marks.

L2 · A — labelled

Labelled names the action Isla performed, so it is the verb.

L15 · D — On Monday, Zoe visited Brisbane.

The sentence begins with a capital, and *Monday*, *Zoe* and *Brisbane* are proper nouns.

L3 · D — labelled

Last week shows the action happened in the past, so *labelled* is correct.

L16 · C — pony's

The singular possessive form *pony's* shows ownership.

L4 · C — securely

Securely describes how the team completed the action.

L17 · B — Their

Their shows that the items belong to a group.

L5 · B — Zoe and I prepared the models.

The subject pronoun *I* is correct because the speaker is part of the subject.

L18 · A — The silver model was placed beside the science dome.

The correct option has a subject, a verb and a complete idea.

L6 · A — because

Because introduces the reason for working that way.

L19 · D — They

They replaces two named people.

L7 · D — theirs

Theirs shows that the item belongs to the two named people.

L20 · C — is

The main subject *box* is singular, so *is* is correct.

L8 · C — The lizards move towards the shelter.

The plural subject *lizards* agrees with the verb *move*.

L21 · B — When ready, return the models.

A comma follows the introductory clause.

L9 · B — shapes

All three examples are shapes.

L22 · A — teachers'

The lunchboxes belong to more than one member of the group; the possessive form is *teachers'*.

L10 · A — .

A calm command is a complete sentence and can end with a full stop.

L23 · D — When will the space exhibition begin at the science dome

The correct option directly asks for information.

L11 · D — we're

The apostrophe in *we're* marks letters omitted from *we are*.

L24 · C — “Bring the models, please,” called Zoe.

The comma stays inside the closing speech mark before the reporting clause.

L12 · C — Before the first tour, we arranged the models.

A comma separates the introductory clause from the main clause.

L25 · B — Neither of the models is complete.

The singular subject *neither* agrees with *is*.

L13 · B — Where should we store the models after the space exhibition

The correct option asks a direct question, so it needs a question mark.

Conventions of Language · L26–L50

L26 · solveTeacher script: say *solve*, pause, then repeat *solve*.**L39 · reuse**Teacher script: say *reuse*, pause, then repeat *reuse*.**L27 · spell**Teacher script: say *spell*, pause, then repeat *spell*.**L40 · value**Teacher script: say *value*, pause, then repeat *value*.**L28 · start**Teacher script: say *start*, pause, then repeat *start*.**L41 · offers**The incorrect word *offrs* should be spelled *offers*.**L29 · stops**Teacher script: say *stops*, pause, then repeat *stops*.**L42 · opens**The incorrect word *opns* should be spelled *opens*.**L30 · study**Teacher script: say *study*, pause, then repeat *study*.**L43 · paints**The incorrect word *pait*s should be spelled *paints*.**L31 · suggest**Teacher script: say *suggest*, pause, then repeat *suggest*.**L44 · replace**The incorrect word *repace* should be spelled *replace*.**L32 · support**Teacher script: say *support*, pause, then repeat *support*.**L45 · display**The incorrect word *dislay* should be spelled *display*.**L33 · surprise**Teacher script: say *surprise*, pause, then repeat *surprise*.**L46 · pleases**The incorrect word *plese*s should be spelled *pleases*.**L34 · talks**Teacher script: say *talks*, pause, then repeat *talks*.**L47 · prepares**The incorrect word *prepres* should be spelled *prepares*.**L35 · teach**Teacher script: say *teach*, pause, then repeat *teach*.**L48 · presents**The incorrect word *presnts* should be spelled *presents*.**L36 · travel**Teacher script: say *travel*, pause, then repeat *travel*.**L49 · protects**The incorrect word *protcts* should be spelled *protects*.**L37 · treat**Teacher script: say *treat*, pause, then repeat *treat*.**L50 · provides**The incorrect word *provdes* should be spelled *provides*.**L38 · understand**Teacher script: say *understand*, pause, then repeat *understand*.

Reading · R1–R15

R1 · A — to explain how echidnas live and survive

The text gives factual information about the habitat, features, food and needs of echidnas.

R9 · A — so each stage is completed before the next one begins

The earlier steps prepare the activity, while the later steps produce and record the result.

R2 · D — a feature that helps a living thing survive

The passage explains that the feature helps the living thing complete tasks and avoid danger.

R10 · D — write down

Here, *record* means to write down the observation or result.

R3 · C — dig for hidden food

Paragraph 2 states that these features help them dig for hidden food.

R11 · C — to make the result easier to check and compare

A clear record makes an observation or result easier to check and compare.

R4 · B — busy roads

The final paragraph identifies busy roads as a challenge.

R12 · B — a materials list and numbered steps

Procedures commonly use a materials list and ordered steps.

R5 · A — echidnas

The pronoun *them* refers back to echidnas.

R13 · A — the object might belong to someone or be delicate

The second paragraph says the object might belong to someone else or be too delicate to handle alone.

R6 · D — Helping Echidnas

The paragraph describes a threat and actions people can take to help echidnas.

R14 · D — paused because of uncertainty

The character pauses to think about ownership and safety.

R7 · C — to make a telephone that carries sound along string

The introduction states that the steps are used to make a telephone that carries sound along string.

R15 · C — a small handbell

The first paragraph says that Zoe noticed a small handbell.

R8 · B — ask an adult to make one hole in each cup

The first numbered step says to ask an adult to make one hole in each cup.

Reading · R16–R30

R16 · B — it protected the object and used the clues safely

The character asks for help or checks evidence instead of handling the discovery carelessly.

R24 · B — Several supplies were weighed, packed and given to a community project.

This option includes the main ideas from the introduction and table.

R17 · A — the discovery becomes part of the place's known story

The final paragraph explains that the discovery becomes part of the place's story.

R25 · A — while mist drift across the sky

The words *mist drift across* describe movement through the sky.

R18 · D — Patience and careful thinking can protect a discovery.

The character succeeds by slowing down, checking clues and protecting the object.

R26 · D — drops or bright reflections on surfaces

The shining drops or reflections look like jewels under the light.

R19 · C — Corn

Corn had a total mass of 36 kg, the greatest value in the table.

R27 · C — The birdbath shows an image of the sky.

A reflective surface can show an image of the sky like a mirror.

R20 · B — 49 kg

$24 \text{ kg} + 25 \text{ kg} = 49 \text{ kg}$.

R28 · B — The sound of leaves in the breeze rises there.

This line directly describes a sound in the scene.

R21 · A — 3 kg

24 kg shared among 8 containers gives 3 kg in each container.

R29 · A — careful and curious

The poem directly says that the speaker feels careful and curious.

R22 · D — Each container could be much heavier.

The number of containers does not show the mass inside each one.

R30 · D — An ordinary place can look special when light, weather or time changes.

The poem notices how familiar surroundings become beautiful and interesting.

R23 · C — given to help others

The supplies were given for a community project.

Numeracy · N1–N15**N1 · A — 199**

The pattern adds 10 each time, so the next number is 199.

N9 · A — 7

$6 \times 7 = 42$.

N2 · D — 700

The digit 7 is in the hundreds place, so its value is 700.

N10 · D — \$17

$5 \times \$2 = \10 , and $7 \times \$1 = \7 . Altogether this is \$17.

N3 · C — $431 < 474$

431 has fewer tens than 474, so $431 < 474$.

N11 · C — 10:00 am

Adding 35 minutes to 9:25 am gives 10:00 am.

N4 · B — 419

$268 + 151 = 419$.

N12 · B — Wednesday

Move forward 9 days from Monday to reach Wednesday.

N5 · A — 371

$655 - 284 = 371$.

N13 · A — 200 cm

1 metre = 100 centimetres, so 2 metres = 200 centimetres.

N6 · D — 64

8 groups of 8 is $8 \times 8 = 64$.

N14 · D — 24 cm

Perimeter = $7 + 5 + 7 + 5 = 24$ cm.

N7 · C — 8

$48 \div 6 = 8$ stickers each.

N15 · C — 21

The rectangle has 3 rows of 7 squares: $3 \times 7 = 21$ square units.

N8 · B — 55

55 cannot be divided into pairs with none left over, so it is odd.

Numeracy · N16–N30**N16 · B — 4000 mL**

1 litre = 1000 millilitres, so 4 litres = 4000 mL.

N24 · B — Tuesday

Tuesday has the greatest value, 29.

N17 · A — 370 g

$1040\text{ g} - 670\text{ g} = 370\text{ g}$.

N25 · A — 3

Team B scored 18 points and team W scored 15 points. $18 - 15 = 3$.

N18 · D — 9/12

The bar has 12 equal parts and 9 are shaded, so the fraction is 9/12.

N26 · D — blue

Blue covers 3 of the 6 equal sections, more than any other colour.

N19 · C — 27

54 divided into 2 equal groups gives 27 in each group.

N27 · C — 29

The pattern adds 5 each time, so the next number is 29.

N20 · B — 4

A square has 4 lines of symmetry.

N28 · B — 34

$59 - 25 = 34$, so $25 + 34 = 59$.

N21 · A — an acute angle

70 degrees is less than 90 degrees, so it is an acute angle.

N29 · A — 37

There are $7 \times 6 = 42$ seats. $42 - 5 = 37$ occupied seats.

N22 · D — 6

A rectangular prism has 6 flat faces.

N30 · D — 21

$7 \times 6 = 42$ seedlings are planted. $63 - 42 = 21$ seedlings remain.

N23 · C — tree

The map shows tree in column D, row 3.

Writing review: Check for a clear opening, complication and ending; paragraphing; precise vocabulary; complete sentences; controlled punctuation; and carefully checked spelling.
