Little Penguins · Questions 1–6

Little Penguins

Little penguins live in rocky coasts and sandy burrows. They are well suited to this place, but they still need food, water and shelter to survive. Conditions can change across the day and through the seasons, so safe resting places are important.

Their waterproof feathers and flipper-like wings help them swim quickly after fish. This adaptation makes everyday tasks easier and can also help them avoid danger. Young animals learn where to feed and shelter by following adults or responding to their surroundings.

They feed on small fish and squid. As they move through their habitat, they also become part of a larger food web that connects plants and animals. Changes to one part of this web can affect many other living things.

One challenge is bright lights near nests. People can help by shielding lights along the coast, observing wildlife from a distance and leaving natural shelters undisturbed. Small, repeated actions can protect the habitat without preventing people from learning about it.

The Book That Changed Shelves · Questions 13–18

The Book That Changed Shelves

Kai was helping to tidy the town library when Kai noticed a red library book. It looked ordinary at first, but a tiny mark on its side seemed freshly scratched. Dust lay everywhere except beneath the object, as though it had recently been moved.

As soon as Kai picked it up, it appeared on a different shelf each morning. Kai hesitated. The discovery was exciting, yet it might belong to someone else or be too delicate to handle alone. A hurried choice could damage both the object and the clues around it.

Instead of rushing ahead, Kai recorded each shelf number and noticed a pattern. Each new clue matched something already visible in the town library, so the search became careful rather than wild. Kai paused after every step to record what had changed.

At last, the pattern pointed to a forgotten reading club notice. Kai wrote a short note explaining where the object had been found and what had happened. The note included the order of the clues so another person could check the discovery.
