Sea Lions Ashore · Questions 1–6

Sea Lions Ashore

Australian sea lions live in sandy islands and rocky beaches. They are well suited to this place, but they still need food, water and shelter to survive. Conditions can change across the day and through the seasons, so safe resting places are important.

Their streamlined bodies and strong flippers help them dive and steer underwater. This adaptation makes everyday tasks easier and can also help them avoid danger. Young animals learn where to feed and shelter by following adults or responding to their surroundings.

They feed on fish and squid. As they move through their habitat, they also become part of a larger food web that connects plants and animals. Changes to one part of this web can affect many other living things.

One challenge is discarded nets. People can help by reporting marine debris, observing wildlife from a distance and leaving natural shelters undisturbed. Small, repeated actions can protect the habitat without preventing people from learning about it.

The Tunnel Behind the Mural · Questions 13–18

The Tunnel Behind the Mural

Tara was helping to tidy the art room when tara noticed a painted tunnel. It looked ordinary at first, but a tiny mark on its side seemed freshly scratched. Dust lay everywhere except beneath the object, as though it had recently been moved.

As soon as Tara picked it up, one painted brick felt cooler than the others. Tara hesitated. The discovery was exciting, yet it might belong to someone else or be too delicate to handle alone. A hurried choice could damage both the object and the clues around it.

Instead of rushing ahead, Tara asked the teacher before pressing it. Each new clue matched something already visible in the art room, so the search became careful rather than wild. Tara paused after every step to record what had changed.

At last, a storage hatch opened to reveal unused art frames. Tara wrote a short note explaining where the object had been found and what had happened. The note included the order of the clues so another person could check the discovery.

By the end of the afternoon, the discovery had become part of the place's story. Tara was proud, not because the object was valuable, but because patience and careful thinking had protected it. The adults agreed that the object should stay with a clear label for future visitors.
