Termite Mounds · Questions 1–6

Termite Mounds

Termites live in tropical grasslands. They are well suited to this place, but they still need food, water and shelter to survive. Conditions can change across the day and through the seasons, so safe resting places are important.

Their tall mounds with narrow air passages help them keep the nest temperature steady. This adaptation makes everyday tasks easier and can also help them avoid danger. Young animals learn where to feed and shelter by following adults or responding to their surroundings.

They feed on dry grass and wood. As they move through their habitat, they also become part of a larger food web that connects plants and animals. Changes to one part of this web can affect many other living things.

One challenge is damage from vehicles. People can help by keeping vehicles on formed tracks, observing wildlife from a distance and leaving natural shelters undisturbed. Small, repeated actions can protect the habitat without preventing people from learning about it.

- 1 To check the walking guide, what is the main purpose of **Termite Mounds**?

- A** to tell a fantasy story about termites
B to give instructions for catching termites

The Last Light in the Tower · Questions 13–18

The Last Light in the Tower

Max was helping to tidy an old coastal tower when max noticed a blinking lamp. It looked ordinary at first, but a tiny mark on its side seemed freshly scratched. Dust lay everywhere except beneath the object, as though it had recently been moved.

As soon as Max picked it up, the lamp flashed a repeating group of numbers. Max hesitated. The discovery was exciting, yet it might belong to someone else or be too delicate to handle alone. A hurried choice could damage both the object and the clues around it.

Instead of rushing ahead, Max wrote the pattern and compared it with a visitor map. Each new clue matched something already visible in an old coastal tower, so the search became careful rather than wild. Max paused after every step to record what had changed.

At last, the numbers identified steps needing repair before the tour. Max wrote a short note explaining where the object had been found and what had happened. The note included the order of the clues so another person could check the discovery.

By the end of the afternoon, the discovery had become part of the place's story. Max was proud, not because the object was valuable, but because patience and careful thinking had protected it. The adults agreed that the object should stay with a clear label for future visitors.

- 13 During mountain lodge work, why did Max hesitate in **The Last Light in the Tower**?
- A** the location was already closed
B the object was too heavy to see
C the clues had all disappeared
D the object might belong to someone or be delicate
